BEYOUT TECH | بيوت تك

ENGINEERING • LIGHT CURRENT (ELV) • MV/LV POWER • SMART BMS

CORPORATE PROFILE 2026
Official Track Record & Capabilities

◆ **CERTIFIED ENGINEERING PARTNER FOR NATIONAL & INDUSTRIAL INFRASTRUCTURE**

Turnkey Engineering Excellence in Light Current (ELV), MV/LV Electrical Grids & Smart Building Automation

ONE-STOP-SHOP CONTRACTING: DESIGN • SUPPLY • INSTALLATION • TESTING & COMMISSIONING

Beyout Tech delivers integrated engineering and turnkey contracting solutions across Egypt. Combining technical precision, strict adherence to international standards (NFPA, TIA/EIA, IEC), and on-schedule project execution, we empower national mega-projects, substations, hospitals, government complexes, industrial plants, and luxury smart compounds.

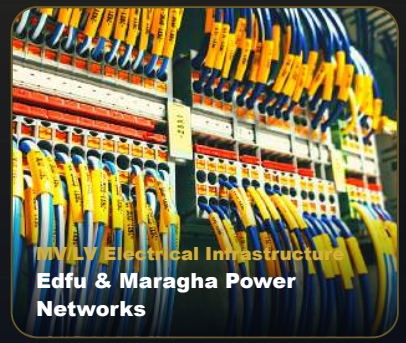

- ◆ Data & Fiber Optic Networks
- ◆ CCTV & Perimeter Security
- ◆ Addressable Fire Alarm (NFPA)
- ◆ Access Control & Biometrics
- ◆ Audio, PA & Nurse Call
- ◆ IP-PBX Telephone & Intercom
- ◆ Queuing & Digital Signage
- ◆ Security Gates & X-Ray
- ◆ MV & LV Power Grids
- ◆ Smart Home & BMS Automation

National Smart Transport — New Administrative Capital
Light Rail Transit (LRT) — 220 KM Fiber Pulling & ~7,000 Splices

Critical Power Substations
Almassed Substation Security (Arish)

MV/LV Electrical Infrastructure
Edfu & Maragha Power Networks

220+ KM	~7,000	42 Bldgs	425	1,950
Fiber Optic Cables Pulled & Tested	Fiber Core Splices & OTDR Tests	Haya Karima Government Complexes	Power Transformers + 3 Distributors	Lighting Columns + 118 KM MV/LV

Beyout Tech — Your Turnkey One-Stop-Shop Partner for ELV & Electrical Contracting

Bridging deep field expertise in national infrastructure projects with next-generation smart building technologies

Company Overview
ABOUT BEYOUT TECH

Beyout Tech is a premier Egyptian engineering and contracting firm specializing in Light Current (ELV) systems, integrated physical security, Low & Medium Voltage (LV/MV) electrical infrastructure, and Smart Building Automation (BMS & Smart Home). Backed by certified engineers, consultants, and technical specialists, we have successfully delivered major national and enterprise projects alongside Egypt's leading Tier-1 general contractors.

Why Partner With Beyout Tech?
COMPETITIVE ADVANTAGES

- **Single-Source Responsibility:** End-to-end engineering design, supply, installation, programming, and handover.
- **Certified Testing & Commissioning:** Every project is handed over with official **Fluke DSX**, **OTDR**, and **Megger** test reports.
- **Strict Schedule Compliance:** High operational capacity to execute multiple sites simultaneously across all Egyptian governorates.

Our Vision
REGIONAL LEADERSHIP

To lead the region in delivering world-class electrical engineering, Light Current (ELV), integrated security, and smart building solutions that protect lives, secure critical assets, and maximize infrastructure efficiency.

Our Mission & Goal
CLIENT EXCELLENCE

To provide exceptional engineering services that exceed client expectations and build long-term strategic partnerships—delivering every project on schedule, within budget, and with zero consultant punch-list items.

Safety First (HSE)
ZERO-INCIDENT CULTURE

Our highest priority across all project sites is safeguarding our engineers, technicians, clients, and the public through strict adherence to international Health, Safety & Environment (HSE) standards.

Key Sectors We Serve Across Egypt (SECTORS WE SERVE):

- **National Transport & Rail:** LRT electric rail and transit stations.
- **Power Substations & Grids:** Substation security & MV/LV distribution.
- **Government Complexes & Banks:** Haya Karima centers & financial hubs.
- **Hospitals & Healthcare:** Nurse Call, Fire Alarm & PA systems.
- **Industrial Plants & Factories:** Process control, CCTV & power grids.
- **Smart Compounds & Luxury Villas:** KNX/Zigbee Smart Home & BMS.

6-Stage Turnkey Execution Lifecycle — From Survey & Design to Handover & SLA

We follow a rigorous 6-stage engineering methodology to guarantee seamless consultant approval and long-term reliability

01 Pre-Construction & Survey
STAGE 01 — PLANNING & BOQ

Comprehensive site surveys, technical requirement analysis, accurate Bill of Quantities (BOQ) preparation, project scheduling, and regulatory permit coordination.

02 Design & Shop Drawings
STAGE 02 — ENGINEERING

Preparation of detailed Shop Drawings, Single Line Diagrams (SLD), riser diagrams, voltage drop/attenuation calculations, and Material Submittals (MAR).

03 Procurement & Supply
STAGE 03 — CERTIFIED MATERIALS

Sourcing certified equipment, cables, panels, and active components directly from approved international manufacturers with factory test certificates.

04 Field Installation
STAGE 04 — SITE EXECUTION

Civil trenching, conduit & cable tray installation, cable pulling, rack dressing, fusion splicing, and panel mounting supervised by senior site engineers.

05 Testing & Commissioning
STAGE 05 — QA / QC CERTIFICATION

Full system programming and certified testing using calibrated **Fluke DSX** (copper), **OTDR** (fiber), and **Megger** (insulation) analyzers.

06 As-Built, Training & SLA
STAGE 06 — HANDOVER & SUPPORT

Submission of final As-Built drawings, O&M manuals, operator training, warranty certificates, and preventive/corrective maintenance SLA contracts.

◆ Certified Quality Standards & Engineering Codes Applied Across All Projects:

TIA/EIA-568 & ISO 11801
Structured cabling, Cat6/Cat6A copper & Fiber Optic backbone testing.

NFPA 72 & Civil Defense
Addressable & conventional Fire Alarm design and cause-and-effect matrices.

ONVIF & NDAA Security
IP CCTV surveillance, perimeter intrusion (PIDS), X-Ray & access control.

IEC 61439 & Egyptian Code
Medium & Low Voltage (MV/LV) transformers, RMUs, cables & street lighting.

Integrated Light Current (ELV) Systems — Data, Surveillance, Fire Safety & Access

Engineered for high availability, cybersecurity, and compliance with TIA/EIA-568, ISO/IEC 11801, ONVIF & NFPA 72

Data Networks & Fiber Optics

STRUCTURED CABLING & FIBER BACKBONE

High-speed enterprise network infrastructure and long-haul single-mode/multi-mode fiber optic connectivity.

- UTP/FTP Cat6 & Cat6A Copper Pulling & Patch Panels
- Fiber Optic Pulling, Fusion Splicing & ODF Termination
- Industrial RS485 Control Cabling & Telecom Racks
- Certified Fluke DSX-8000 & OTDR Testing Reports

CCTV & Perimeter Security

IP SURVEILLANCE & WALL INTRUSION (PIDS)

AI-powered 4K IP video surveillance and perimeter fence/wall intrusion detection for critical facilities.

- Fixed, Varifocal, PTZ & Thermal IP Cameras
- Central Control Rooms, Video Walls & NVR/RAID Storage
- Perimeter Wall Intrusion Detection Systems (PIDS)
- ANPR / LPR License Plate Recognition & AI Analytics

Addressable & Conventional Fire Alarm

LIFE SAFETY & NFPA 72 COMPLIANCE

Early smoke, heat, and gas detection systems engineered to Civil Defense and NFPA 72 life safety codes.

- UL/EN-Certified Addressable & Conventional FACP Panels
- Optical Smoke, Rate-of-Rise Heat & Beam Detectors
- Manual Call Points (MCP) & Strobe/Horn Sounders
- Control & Monitor Modules for HVAC, Elevators & Access

Access Control & Time Attendance

BIOMETRICS & MULTI-DOOR CONTROLLERS

Smart biometric and RFID access management for corporate headquarters, server rooms, and industrial plants.

- Facial Recognition, Fingerprint & RFID Card Terminals
- Heavy-Duty Magnetic (EM) Locks, Drop Bolts & Exit Buttons
- Centralized Multi-Door TCP/IP Access Controllers
- HR Time Attendance Software & Fire Alarm Emergency Release

Specialized ELV Systems — Public Address, Telecom, Queuing & Physical Screening

Complete institutional solutions for hospitals, citizen service complexes, banks, airports, and strategic substations

Public Address & Nurse Call Systems

PRO AUDIO, VOICE EVACUATION & HEALTHCARE

Multi-zone voice evacuation/paging and IP Nurse Call systems for hospitals and medical centers.

- Ceiling, Wall & Horn Speakers + Matrix Power Amplifiers
- Emergency Voice Evacuation Linked to Fire Alarm
- Hospital Nurse Call Bed Units, Pull Cords & Corridor Lamps
- Conference Room & Auditorium Pro-Audio Systems

IP-PBX Telephone & Intercom

UNIFIED COMMUNICATIONS & VIDEO INTERCOM

Enterprise VoIP telephony, hybrid PBX exchanges, and smart IP video intercom networks for buildings and compounds.

- IP-PBX Servers, FXO/FXS Gateways & SIP Trunks
- Executive & Standard PoE IP Desk Phones
- Multi-Building IP Video Intercom & Guard Master Stations
- Automated Attendant (IVR), Call Recording & Branch Linking

Queuing & Digital Signage

CITIZEN SERVICE CENTERS & BANKING HALLS

Smart customer journey management, interactive ticket kiosks, and synchronized audio-visual calling displays.

- Interactive Touch Ticket Dispenser Kiosks with Thermal Printer
- Main Waiting Hall & Counter Digital Signage Monitors
- Bilingual Audio-Visual Voice Calling & Counter Terminals
- Real-Time Service Analytics & KPI Dashboards

Security Gates, Barriers & X-Ray

PHYSICAL SCREENING & VEHICLE ACCESS

High-security entrance screening for power substations, ministries, malls, and industrial facilities.

- Multi-Zone Walk-Through Metal Detector Gates (18/33 Zones)
- Dual-Energy X-Ray Baggage & Parcel Inspection Scanners
- Hydraulic Bollards, Road Blockers & Automatic Car Barriers
- Flap Barriers, Tripod Turnstiles & Long-Range UHF Readers

Smart Home & Building Automation (BMS) — Luxury Control, Energy Efficiency & Safety

Over 90 smart products and 6 turnkey packages for apartments, penthouses, luxury villas, and corporate headquarters

Integrated Smart Ecosystem

RETROFIT (NO-NEUTRAL) & WIRED KNX SOLUTIONS

Beyout Tech's Smart Home & BMS division unifies lighting, climate (HVAC), motorized curtains, smart locks, CCTV, audio, and safety sensors into a single intuitive interface—accessible via luxury wall touch panels, mobile app, and Arabic/English voice commands. Available in both **Retrofit (zero wall-breaking)** and **Wired KNX** architectures.

Smart Villa & Landscape Automation

Luxury Glass & Gold Touch Panels

1. Bodyguard Package

WAREHOUSES & STORES

Smart perimeter & asset protection: motion/door sensors, high-decibel siren, smoke/fire alert, and instant mobile intrusion notifications.

2. Smart Studio Package

1-BEDROOM & STUDIOS

Smart lighting switches, AC control, natural gas leak detector, door sensors, and full mobile app remote control.

3. 2-Bedroom Apartment

MODERN FAMILY HOMES

Reception & bedroom smart lighting, intelligent AC scheduling, corridor motion sensors, and kitchen gas/water safety.

4. 3-Bedroom Apartment

COMPREHENSIVE COMFORT

Motorized curtains, multi-zone AC & decorative lighting scenes, water leak protection, and full voice assistant integration.

5. Luxury Duplex Package

MULTI-LEVEL AUTOMATION

Biometric smart door lock, home cinema scenario, heavy-load smart breakers, staircase motion lighting, and multi-floor control.

6. Full Smart Villa Package

3 FLOORS + GARDEN & POOL

Complete 3-floor villa automation, smart irrigation, swimming pool & gate control, central touch screens, and vacation security mode.

BEYOUT TECH | ENGINEERING SOLUTIONS
Light Current (ELV) • Low & Medium Voltage (MV/LV) • Smart BMS

ELECTRICAL POWER INFRASTRUCTURE DIVISION • MEDIUM & LOW VOLTAGE NETWORKS (MV / LV)

Medium & Low Voltage (MV / LV) Power Grids — Substations, Transformers & Street Lighting

Turnkey electrical contracting for cities, industrial zones, and national rural development initiatives across Egypt

01 Distributors & RMUs
MEDIUM VOLTAGE SWITCHGEAR

Supply and installation of main Medium Voltage distributors (11kV / 22kV) and Ring Main Units (RMUs) with protection relays.

02 Power Transformers
DISTRIBUTION & KIOSKS

Installation and commissioning of oil-immersed and dry-type distribution transformers (up to 2500 kVA) and package substations.

03 MV & LV Cabling
PULLING, ENDS & JOINTS

Excavation, trenching, and pulling of underground XLPE MV/LV cables, including heat-shrink/cold-shrink cable terminations and joints.

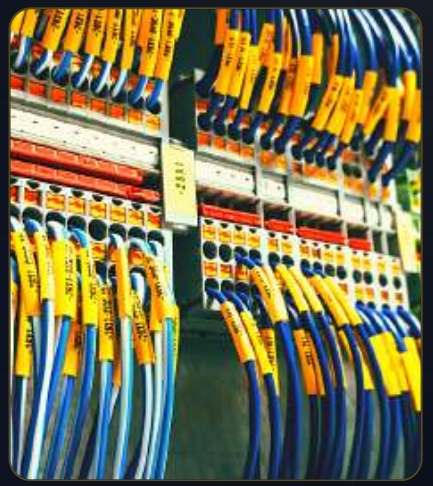

04 Panels & Street Lighting
MDB, CAPACITORS & POLES

Main Distribution Boards (MDB), ATS, Power Factor Correction panels, earthing networks, and galvanized street lighting columns.

◆ Proven MV/LV Track Record in Upper Egypt (Aswan & Sohag):

425	3	118 KM	1,950
Power Transformers	Main MV Distributors	51km MV + 67km LV	Street Lighting Poles

- **Edfu Center (Aswan):** Installed 2 main MV distributors, 360 transformers, 33 km MV cables, 45 km LV cables, and 1,230 lighting columns.
- **Maragha Center (Sohag):** Installed 1 main MV distributor, 65 transformers, 18 km MV cables, 22 km LV cables, and 720 lighting columns.

Critical Power Substation Security | 📍 Arish — North Sinai | 📅 March 2022 – October 2022

Integrated Security Systems for Almassed Substation (Arish - Sinai)

TURNKEY SURVEILLANCE, PERIMETER INTRUSION & ACCESS SCREENING

Client / Main Contractor	Project Location	Project Status
Madkour Projects	**Arish — North Sinai**	**100% Delivered & Certified**

35	450m	X-Ray	1
IP Surveillance Cameras	Wall Intrusion (PIDS)	Baggage + Metal Gate	Auto Car Barrier

◆ Executed Engineering Scope of Work:

- Supply, installation, testing, and commissioning of an integrated 35-camera IP CCTV surveillance network covering all transformer bays and switchyards.
- Securing the 450-meter external substation boundary with a Wall Intrusion Detection System (PIDS) integrated with the central security control room.
- Installation and commissioning of a heavy-duty Automatic Car Barrier for vehicle entry/exit control.
- Supply and installation of a Walk-Through Metal Detector Gate and Dual-Energy X-Ray Baggage Scanner for personnel and visitor screening.

National Smart Transport & Fiber Backbone | 📍 New Administrative Capital — Cairo | 🗓 Feb 2022 – July 2022

Pulling & Termination of Fiber Optic Cables – Light Rail Transit (LRT)

220 KM FIBER OPTIC NETWORK & ~7,000 CORE FUSION SPLICES

Client / Main Contractor	Project Location	Testing & Handover
GTCI (Altawakol Group)	**New Capital — Cairo**	**100% OTDR Certified**

220 KM	4 Core	~7,000	OTDR
Fiber Cables Pulled	Single-Mode Fiber	Fusion Splices (Cores)	Full Attenuation Test

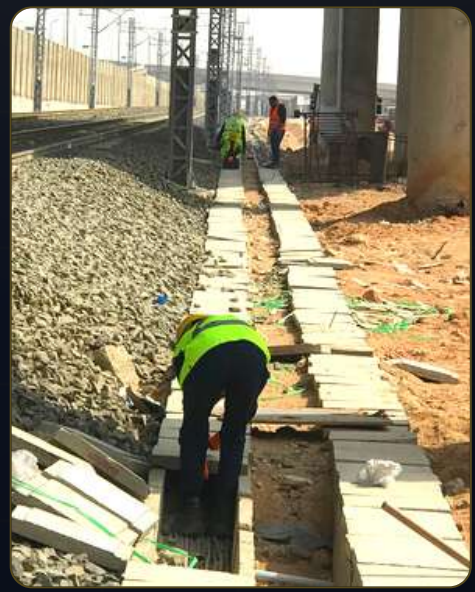

◆ Executed Engineering Scope of Work:

- Pulling and laying 220 kilometers of 4-Core Fiber Optic Cables along the tracks, tunnels, and stations of the Light Rail Transit (LRT) mega-project.
- Precision fusion splicing and termination of approximately 7,000 fiber cores inside trackside junction boxes and station ODF racks.
- Comprehensive bi-directional OTDR attenuation and reflection testing with 100% consultant approval.

Presidential Initiative — Haya Karima | 📍 Ashmoun — Monufia Governorate | Jan 2022 – May 2022

Queuing & Digital Signage Systems in Citizen Service Centers (14 Buildings)

QUEUE SYSTEM IN CITIZEN SERVICE CENTERS – HAYA KARIMA (ASHMOUN)

Client / Main Contractor	Project Scope	Project Location
Kharafi National	**14 Government Complexes**	**Ashmoun — Monufia**

14	266	19	14 Kiosks
Government Complexes	Total Display Monitors	Monitors per Building	Touch Ticket Dispensers

◆ Executed Engineering Scope of Work:

- Supply, installation, programming, and commissioning of digital customer queuing systems across 14 Citizen Service Complexes in Ashmoun.
- Equipping each building with 19 commercial display monitors for waiting halls and service counters (266 monitors in total).
- Supply and installation of 1 interactive Touch Ticket Dispenser Kiosk, counter calling units, and audio-visual announcement controllers per building.

Case Study 04 — Addressable Fire Alarm | Jan 2022 – May 2022

Fire Alarm Systems in Citizen Service Centers (14 Buildings - Haya Karima)

ADDRESSABLE FIRE ALARM – HAYA KARIMA (ASHMOUN, MONUFIA)

14	574	42	70
Addressable Panels	Smoke Detectors (41/Bldg)	Heat Detectors (3/Bldg)	Sirens + Control Modules

- **Client:**Kharafi National — Ashmoun, Monufia.
- Equipped 14 government complexes with 1 Addressable FACP, 41 Smoke Detectors, 3 Heat Detectors, 5 Sirens, and Control/Monitor Modules per building.

Case Study 05 — Structured Data Networks | May 2022 – Sept 2022

Data Networks in Agricultural Service Centers (14 Buildings - Haya Karima)

STRUCTURED CABLING & RACKS – HAYA KARIMA (ASHMOUN, MONUFIA)

14	42	630+	Fluke
Telecom Racks	Switches (3/Bldg)	Cat6a Data Outlets	100% Tested & Certified

- **Client:**Kharafi National — Ashmoun, Monufia.
- Deployed structured cabling across 14 agricultural complexes (1 Rack, 3 Switches, and 45 Cat6a Data Outlets per building) with full Fluke DSX certification.

MV / LV Power Grids & Street Lighting | 📍 Edfu — Aswan Governorate | 📅 May 2022 – Jan 2023

Replacing & Renovation of Electrical Infrastructure in Edfu (Aswan)

TURNKEY MEDIUM & LOW VOLTAGE POWER DISTRIBUTION NETWORK

Client / Main Contractor	Project Location	Timeline
Kharafi National	**Edfu — Aswan**	**May 2022 – Jan 2023**

360	2	78 KM	1,230
Power Transformers	Main MV Distributors	33km MV + 45km LV	Lighting Columns

◆ Executed Engineering Scope of Work:

- Replacement, renovation, supply, and installation of 2 Main Medium Voltage Distributors and 360 distribution transformers across Edfu villages.
- Trenching, laying, and pulling 33 km of Medium Voltage (MV) cables and 45 km of Low Voltage (LV) underground and overhead cables.
- Supply and installation of 1,230 street lighting columns along with all MV/LV cable terminations, joints (Ends & Connectors), and insulation testing.

MV / LV Power Grids & Street Lighting | 📍 Maragha — Sohag Governorate | Oct 2022 – Feb 2023

Replacing & Renovation of Electrical Infrastructure in Maragha (Sohag)

TURNKEY MEDIUM & LOW VOLTAGE POWER DISTRIBUTION NETWORK

Client / Main Contractor	Project Location	Timeline
Kharafi National	**Maragha — Sohag**	**Oct 2022 – Feb 2023**

65	1	40 KM	720
Power Transformers	Main MV Distributor	18km MV + 22km LV	Lighting Columns

◆ Executed Engineering Scope of Work:

- Replacement, renovation, supply, and installation of 1 Main MV Distributor and 65 distribution transformers across Maragha Center in Sohag.
- Pulling and testing 18 km of Medium Voltage (MV) cables and 22 km of Low Voltage (LV) distribution cables.
- Installation of 720 public street lighting columns, complete with cable terminations, joints (Ends & Connectors), and full commissioning.

Our Valued Clients — Trusted by Egypt's Leading Enterprises & Contractors
